110+ Ready-to-Copy-Paste ChatGPT Prompts

A Practical Playbook for Online Store Owners in the US, UK, Canada & Australia

How to Use This Vault

This vault contains 110+ battle-tested ChatGPT prompts built specifically for Shopify store owners. Every prompt follows the same simple system: copy it, replace the bracketed placeholders with your own details, and paste it into ChatGPT (or any AI assistant).

Getting great output comes down to one habit: the more specific your placeholder details, the better the result. "A skincare serum for tired skin" will always beat "a serum."

Quick-Start Checklist

- Find the prompt you need using the Table of Contents or chapter dividers.
- Copy the full prompt exactly, including the instruction to "act as" an expert — this primes ChatGPT for better output.
- Replace every [Placeholder] with your real product, audience, and brand details.
- Run it, then ask ChatGPT to "make it shorter," "make it punchier," or "try a different angle" to iterate quickly.
- Save your best outputs as new custom prompts — build your own personal swipe file over time.

Common Placeholders Used in This Vault

Keep these definitions handy — a full glossary is also included at the back of this guide.

- [Product Name] — the exact name of the product you're writing about
- [Niche] — your store's category, e.g., "sustainable activewear" or "pet grooming"
- [Target Audience] — who you're selling to, e.g., "busy moms aged 30-45"
- [Key Features] / [Main Benefit] — what the product does and why it matters
- [Tone/Voice] — e.g., playful, luxury, minimalist, bold
- [Brand Name] — your store or company name

Tip: keep a simple notes file with your go-to answers for these placeholders. Most prompts in this vault reuse the same 10-12 placeholders, so filling them in becomes almost instant after your first pass.

Final Tips to Get the Most Out of This Vault

1. Feed ChatGPT real context first.

Before running a prompt, paste in a few real customer reviews, your brand's About page, or a past best-selling listing. ChatGPT writes noticeably better copy when it has real material to draw from instead of guessing.

2. Always generate 2-3 versions.

Ask ChatGPT to "give me 3 variations" of any prompt in this vault. You'll almost always get one version that outperforms the others — and you can A/B test them directly in your ads or emails.

3. Edit for your brand voice.

Treat every output as a strong first draft, not a final one. Read it out loud, cut anything that doesn't sound like you, and adjust for your specific market's spelling and tone (e.g., US vs. UK/AU English).

4. Build a swipe file.

Keep a running document of your best-performing outputs, organized by chapter. Over time, this becomes a personalized version of this vault, tuned specifically to your store and audience.

5. Stay compliant.

Always fact-check specific claims (health, safety, environmental, or performance claims) before publishing, and follow your platform's advertising policies and your region's consumer protection rules.
